

GradeAvg IPO Chart

SECTION 1 IPO CHART

Program name	GradeAvg	
INPUT	PROCESS	OUTPUT
Five whole-number grades entered by the user	- Keep a running total and add each grade with the += operator - Divide the total by the number of grades using real division - Format the average to two decimal places	The average grade displayed as a percentage

SECTION 3 PSEUDOCODE

I planned the program in the same order that it runs.

1	Start
2	Set the total to 0
3	Repeat five times
4	Ask the user for a grade
5	Read the grade and add it to the total
6	Divide the total by 5.0 to calculate the average
7	Display the average as a percentage with two decimal places
8	End
