Chapter 6 Error Log

Assignment: Methods | November 2, 2026

TimeConverter

Error message / unexpected behaviour: None encountered in the program during compilation or testing.

Cause / fix: Not applicable; no program correction was needed.

Checks: All four conversions, zero, and fractional values passed.

SpanishNumbers

Error message / unexpected behaviour: None encountered in the program during compilation or testing.

Cause / fix: Not applicable; no program correction was needed.

Checks: All ten translations and the complete printed sequence passed.

Exponentiation

Error message / unexpected behaviour: None encountered in the program during compilation or testing.

Cause / fix: Not applicable; no program correction was needed.

Checks: Positive, zero, negative, fractional, and negative-base examples passed.

AddCoins - Exercise 5

Error message / unexpected behaviour: None encountered in the program during compilation or testing.

Cause / fix: Not applicable; no program correction was needed.

Checks: The $1.08 textbook example, zero coins, one cent, individual coin values, and whole-dollar totals passed.

PerfectIntegers - Exercise 7

Error message / unexpected behaviour: None encountered in the program during compilation or testing.

Cause / fix: Not applicable; no program correction was needed.

Checks: Every value from 1 through 100 was checked. Only 6 and 28 matched. Zero, one, negative values, and 496 were also checked.

Code-error screenshots: not applicable because no failing program code was encountered. The actual Eclipse JUnit result is saved in Tests/JUnit-Screen-Dump.png: 12 runs, 0 errors, 0 failures.
