

RectanglePerimeter IPO Chart

SECTION 1 IPO CHART

Program name	RectanglePerimeter		
INPUT	PROCESS	OUTPUT	
Width of 4 and length of 13 stored in variables	- Multiply the width by 2 - Multiply the length by 2 - Add both results to calculate the perimeter	The perimeter of the rectangle	

SECTION 3 PSEUDOCODE

I planned the program in the same order that it runs.

1	Start
2	Set width to 4
3	Set length to 13
4	Calculate perimeter as $2 \times \text{width} + 2 \times \text{length}$
5	Display the perimeter of the rectangle
6	End
