

Digits IPO Chart

SECTION 1 IPO CHART

Program name	Digits	
INPUT	PROCESS	OUTPUT
A two-digit whole number entered by the user	- Make the number positive so the same steps work for a negative number - Use integer division and remainder to find the tens digit - Use remainder 10 to find the ones digit	- The ones-place digit - The tens-place digit

SECTION 3 PSEUDOCODE

I planned the program in the same order that it runs.

1	Start
2	Ask the user to enter a two-digit number
3	Read the number
4	Make the number positive
5	Use remainder 10 to get the ones digit
6	Divide the number by 10 and use remainder 10 to get the tens digit
7	Display the ones-place digit
8	Display the tens-place digit
9	End
